## - An Energy Smart Activity for Juniors

It's time to get up and learn all about **Energy**. The **sun** is shining and we have lots to do.

Did you know that **Renewable Energy** gets all its energy for making **electricity** from the **weather**?

**Solar Power** is electricity made from the sun's energy. Draw a picture of you having fun on a sunny day at the beach.

**Wind energy** is electricity made from energy in the wind. Draw a picture of you flying a kite on a windy day.

**Hydro Power is electricity made from energy from water for which we need rain. Draw a picture of you out in the rain.**

A large, empty rectangular box with rounded corners, intended for a student to draw a picture of themselves outdoors in the rain.

**Bioenergy is electricity made from waste material such as plants. Plants need the sun and rain to grow. Draw a picture to show healthy plants growing.**

A large, empty rectangular box with rounded corners, intended for a student to draw a picture showing healthy plants growing.
